

RED SEA

HEALTH TOURISM

CLUSTER

2022

First Edition

Introduction

Since the beginning of the history, Egypt was one of the pioneers in healthcare. “The ancient Egyptians practiced medicine with highly professional methods.

They had advanced knowledge of anatomy and surgery. Also, they treated a lot of diseases including dental, gynecological, gastrointestinal, and urinary disorders. They could diagnose diabetes and cancer.

“The used therapeutics extended from different plants to include several animal products and minerals. Some of these plants are still used in the present day.

Fortunately, they documented their life details by carving on stone, clay, or papyri. Although a lot of these records have been lost or destroyed, the surviving documents represent a huge source of knowledge in different scientific aspects including medicine.”

“Saudi J Biol Sci. 2021 Oct; 28(10): 5823–5832.”

Today, Egyptian doctors are doing miracles wherever they work. Egypt are welcoming patients from allover the world not only to get medical and wellness treatment but to enjoy the hospitality of Egyptians and unique climate allover the year.

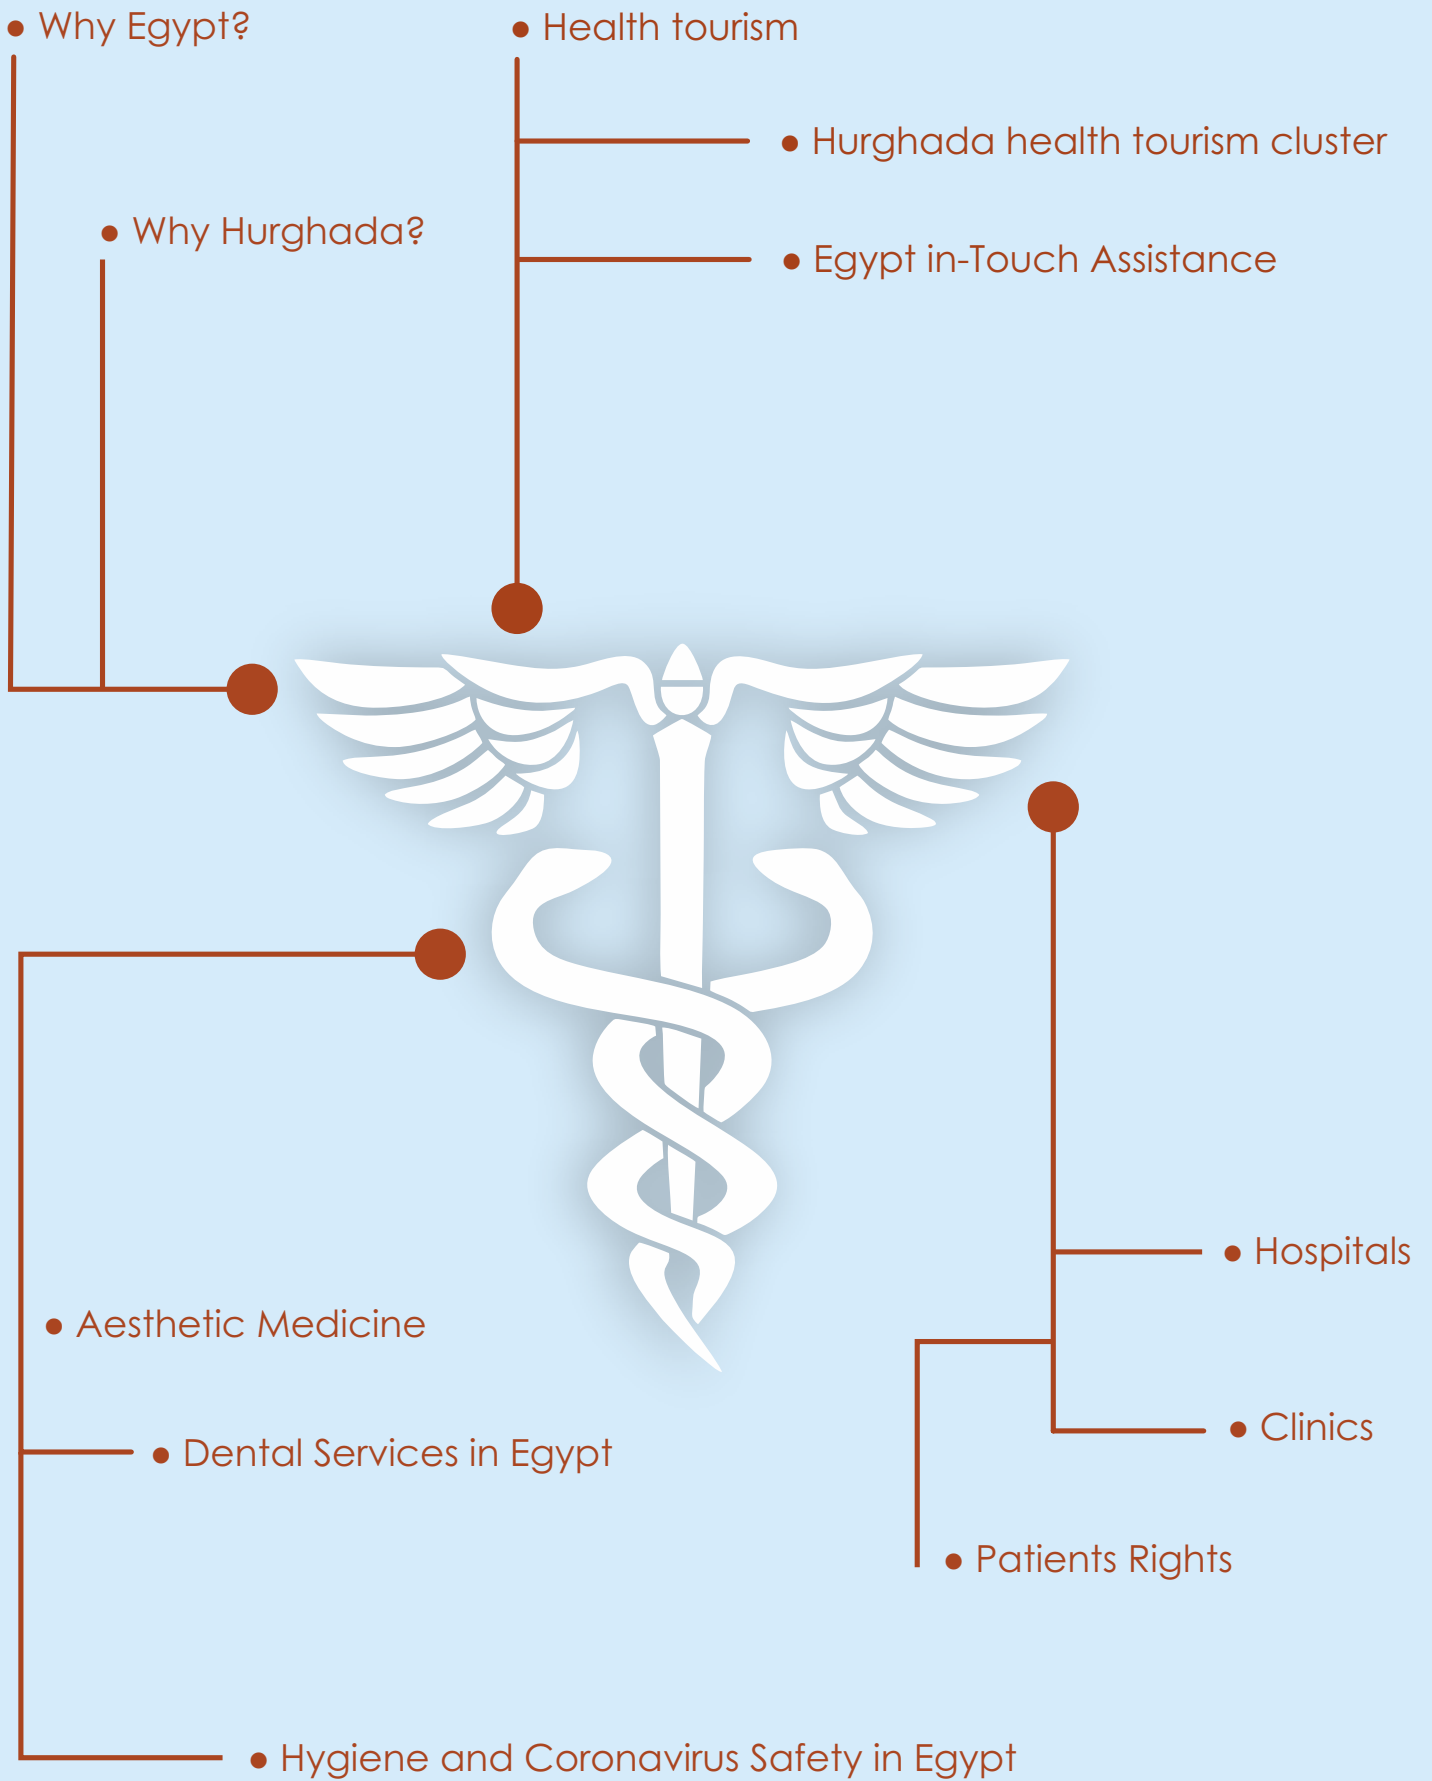

The success of Egyptian healthcare is due to an effective public private partnership where you can find a lot of options regarding the specialties, locations and prices but above all a quality you expect and more.

A curative journey awaits you in Hurghada where most of top medical facilities decided to join forces to provide you a unique experience.

This is just the beginning..

Index contains

Why Egypt?

Home of the ancient pharaohs, Egypt is a dazzling destination of temples and tombs that wow all who visit, it's not all historic treasures, Egypt has so much for travelers to see and do, it's the perfect country for a mix of activities combining culture, adventure and relaxation. Also, Egypt occupies a distinguished position in the health tourism in the world. The great thing about combining a holiday with cosmetic surgery or any other preferable treatments in Egypt is that both can be achieved for the price it would cost for just a surgery in some countries. Imagine having body enhancement surgery at a private Hospital near the Red sea or overlooking the Nile and the Pyramids. Before or after surgery, medical tourists can relax on beautiful beaches or be pampered at one of the country's spa resorts to help restore energy, stamina and vitality before returning home feeling refreshed and renewed.

Why Hurghada?

Hurghada was founded in the early 20th century. The village, which later evolved into what is now the city of Hurghada, was first settled in 1905. It acquired its name from a plant which has grown there naturally since the days of Ancient Egypt. For many decades it was a small fishing village, but it has grown into a major Red Sea resort as a result of Egyptian and foreign investment that began in the 1980s. Holiday resorts and hotels provide facilities for wind surfing, kite surfing, yachting, scuba diving and snorkeling.

The city is known for its water sports, nightlife and warm weather. Daytime temperatures are around 30 °C (86 °F) most of the year, and during July and August temperatures can reach over 40 °C (104 °F). Hurghada is a popular holiday destination for Europeans, especially during the winter, and some spend Christmas and New Year there including a long stay during winter time.

Hurghada's major industry is foreign and domestic tourism, owing to its landscape, year-round hot and dry climate and long beaches. Its waters are clear and calm for most of the year and have become popular for water-sports, particularly scuba diving and snorkelling. There are diving sites around Abu Ramada Island, Fanadir, Giftun Kebir, and Giftun Soraya. Tourists also visit shipwrecks such as the El Mina or the Rosalie Moller. The beach at Hurghada is busy and public, and beyond the town the coast road passes through holiday villages set in the desert.

Visitors of Hurghada can enjoy an amazingly relaxing holiday by booking a treatment or two at one of Hurghada's best SPAs also you can book your treatment service and get your treatment plan during your holiday through Egypt in Touch Assistance www.egyptintouchassistance.com medical network with the highest quality and the most reasonable prices.

GREAT PYRAMIDS, GIZA

Red Sea Health Tourism Cluster

Health Tourism

There are two types of Health tourism which are (Medical and non-Medical Tourism)

Medical Tourism

The most common procedures that people undergo on medical tourism trips include dental care, surgery, cosmetic surgery, fertility treatments, cancer treatment and many others.

Wellness Tourism

Examples of inner wellness tourism experiences include: day spa and hotel spa thalassotherapy, exercise, sliming and long stay packages.

After leaving:

- Follow up after treatment
- Keep in touch for any inquires

Hygiene and Coronavirus Safety in Egypt.

Egypt has been among the first countries to take preventive safety measures against the deadly coronavirus after its outbreak in China's Wuhan province and reported spread to other countries around the world.

Strict implementation of COVID-19 safety and hygiene measures and close collaborations with tourism stakeholders set the course for safe travels to Egypt.

Hygiene Safety Certificates are now a pre-requisite for hospitality establishments, tour operators, archeological sites, and museums, to resume their operations and receive visitors.

COVID-19 protective measures:

Protect yourself and those around you:

- Get vaccinated as soon as it's your turn and follow local guidance on vaccination.
- Keep physical distance of at least 1 meter from others, even if they don't appear to be sick. Avoid crowds and close contact.
- Wear a properly fitted mask when physical distancing is not possible and in poorly ventilated settings.
- Clean your hands frequently with alcohol-based hand rub or soap and water.
- Cover your mouth and nose with a bent elbow or tissue when you cough or sneeze. Dispose of used tissues immediately and clean hands regularly.
- If you develop symptoms or test positive for COVID-19, self-isolate until you recover.

CLINICS & MEDICAL CENTERS

DANIEL EYE CENTER

Daniel Eye Center is part of the organization “Daniel Healthcare.” It was established on December 28, 2020. Its mission is to help improve the quality of life by improving people's sight and allowing this to be within reach to those who otherwise can not afford it.

Our slogan is “Caring heart, healing hands.” And it is not just a slogan but a way of life that we want to strive to achieve. Our vision is to model a high quality, sustainable ophthalmic surgical center with a special emphasis on cataract surgery.

The center is positioned entirely on a patient-centered approach.

The project was inspired by the great project of Dr. Govindappa Venkataswamy (known by Dr. V) the founder of Aravind Eye Hospitals

Our mission is to reach that equilibrium between performing a large number of eye surgeries – especially those related to reversible blindness – performed with a high degree of efficiency and proficiency yet with a comparatively low price that can be afforded by people with a lower economic status whose access to a high-quality ophthalmic care might be otherwise not possible

The center itself is equipped with world class equipment whether for examination, performing investigations or interventions. For instance, our OCT machine is the CIRRUS HD-OCT 5000/500 from Carl Zeiss. Likewise, we have VISULAS YAG III and OPMI Lumera i for the YAG laser machine and the surgical microscope, both from Zeiss. We also have the renowned CENTURION Vision System from Alcon for phacoemulsification. The center uses ComRec-Solutions which is a full paperless hospital management system, composed of a complete tabular Electronic Medical Records (aka EMR) and financial / HR system all in one coherent database.

HURGHADA SURGERY CLINIC

Hurghada Surgery is a medical services group located in Hurghada, Red Sea, Egypt. We specialize in the surgery of obesity, Gastrointestinal, Thyroid and Breast diseases.

We operate two highly specialised departments in medical tourism and medical education.

With our professional, caring team and affiliated hospitals, we will make sure you are taken care of. We are committed to excellence in our work and the highest level of personal care for each of our patients.

At Hurghada surgery, we choose the best staff to take care of you during your time with us and the highest quality equipment for your procedure.

As our patient, you will receive the best care you deserve with patient-focused nursing care during your recovery process.

You may rest assured that the center meets the highest standards in health care.

“Our Mission is to care for our patients, and improve Healthcare and medical tourism in Egypt.

Our Vision is to be the healthcare provider of choice.

Our goal at Hurghada surgery is to provide you with the highest quality surgical services in a comfortable and safe environment. We offer expertise, convenience, and simplicity that is unmatched.”

MEDICAL TOURISM

At Hurghada Surgery we can provide Medical and Healthcare in the international standards and a comparatively low cost.

Also, we arrange accommodation and tourism programs at the highest level from the moment of arrival until departure safely to your country.

At Hurghada Surgery, we take into consideration all abroad patients' motivations and expectations. These do usually vary from one patient to the other and depend mainly on their home country, their culture, and on the type of medical treatment requested.

We have thus decided to give priority on our Medical Tourism website to the medical specialties and surgical/medical treatments most demanded by our international patients: plastic and cosmetic surgery, fertility treatments, bariatric surgery, hair transplantation and general surgery

- **Clinical Quality:**

We are committed to outstanding patient care and clinical outcomes.

- **Integrity:**

We do what is right, no matter how difficult, without exception.

We say what we mean, and we do what we say.

- **Service Excellence:**

We seek to exceed the expectations of patients and each other in everything we do.

- **Teamwork:**

We work together, helping and supporting one another to make our center successful.

- **Accountability:**

We take complete, personal responsibility for our actions and commitments.

- **Continuous Improvement:**

We seek to relentlessly improve our performance in every area – clinical, operational, and financial – constantly pushing ourselves to new heights.

Dental Service in Egypt

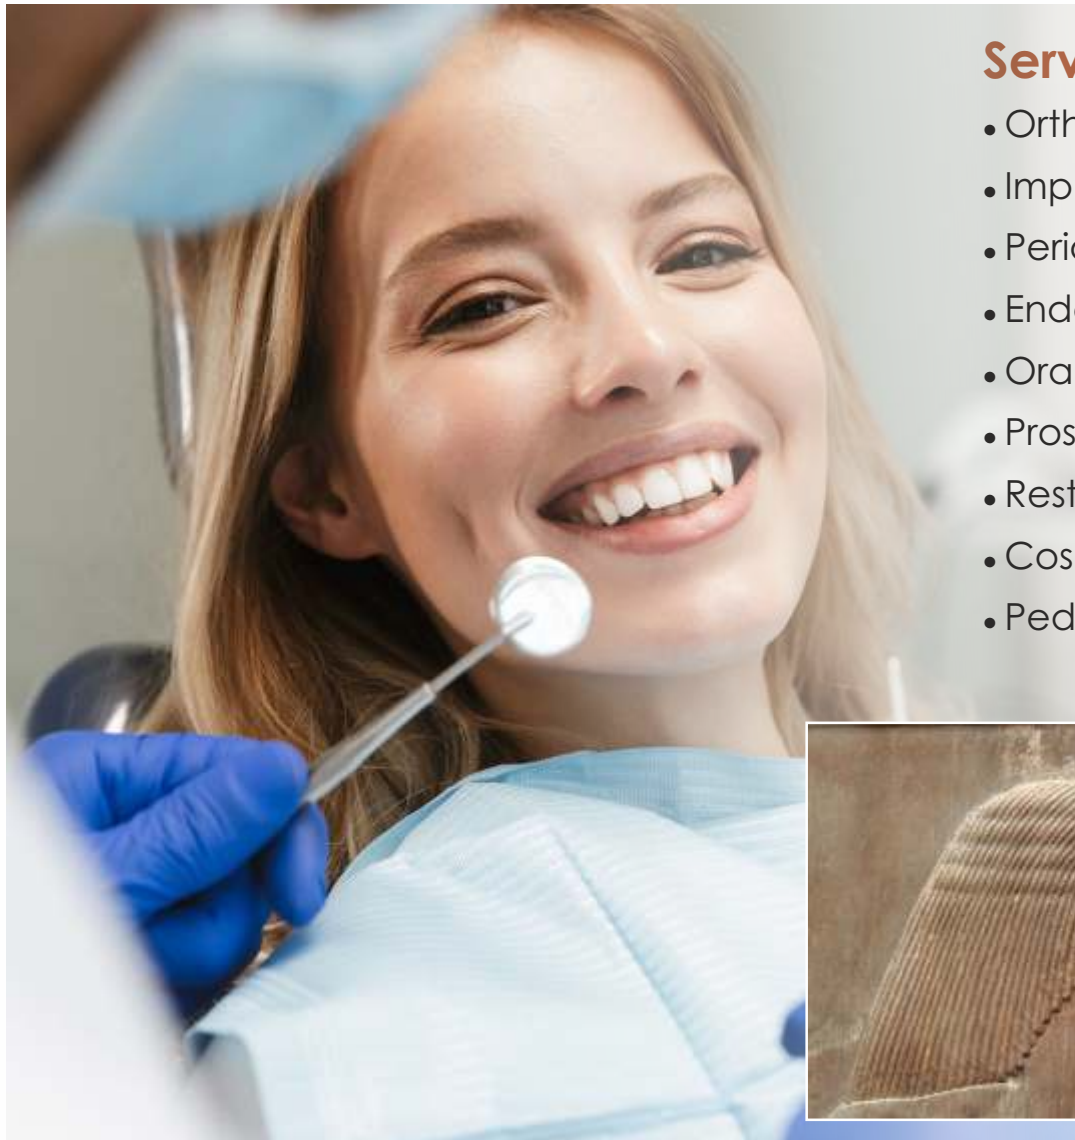

One of the most famous and the oldest history of dentistry is an Egyptian history, which is around 4600 years old. The research has shown that dentist could have existed as early as 3000 BC in Egypt.

It is believed by the researchers that Ancient Egyptian mummies have revealed that dental cavities as well as tooth abscesses were seen around 2500 BC. Following are speculations which based on the best evidence that is currently known about the Egyptian dentistry.

Hesi-Re is first well-known dentist and is one of those great physicians who dealt with teeth issues. Dentists demand was very high at that time, even, because aristocrats of Ancient Egypt were very concerned with their oral health. They had servants, particularly attend to their teeth.

There are several dental ailments that were present among that old time.

Dentists dealt mainly with tooth pain caused by abscesses, dental caries, or possibly other diseases such as gingivitis.

Services

- Orthodontics
- Implants
- Periodontics
- Endodontics
- Oral surgery
- Prosthodontics
- Restorative
- Cosmetic dentistry
- Pediatric dentistry.

A Brief History of Dentistry

Since the early days of mankind, teeth have been a big part of our health care. In the earliest days, man did not know the benefits of proper dental care, and as a result regularly lost their teeth. Beginning in Ancient Egyptian times, basic dental care was starting to be practiced. In fact, the earliest instances of dentistry can be traced as far back as 7500 B.C., where the Egyptians began to use replacement teeth in place of missing ones.

Over time, dentistry has undergone a number of changes. From the simplest methods for tooth care to the use of modern materials and dental methods, dentistry has changed dramatically.

ON CALL CLINIC

We are the company which provides medical services in Egypt. Our center is located in Hurghada, Egypt.

We see walk-in patients in our clinic.

Moreover, we do also house calls to Egyptians, resident foreigners and tourists during their stay in Egypt.

Our Values

Honesty, reliability and speed in delivering medical services with competitive affordable prices in addition to convenience and hassle-free services to our patients.

Our Mission

We are committed to provide high quality decent smooth justified medical care that is affordable, quick and convenient in Hurghada and throughout whole Egypt by arrangement via our white medical network and outsourced trusted medical providers.

We work in an intimate and inviting setting making sure that you and your family experience the best quality of care all under one roof.

Our Passion

To provide patients with truly needed medical services whether in our facility or professionally & honestly directing them in the right way according to their medical condition and other issues related to them.

Our Vision

To consolidate the concept of the family clinic & presenting it in a decent efficient modern manner without complicated or expensive procedures.

AESTHETIC

MEDICINE

In modern years, aesthetics has become quite important in every aspect of everyday life: following the hundreds of journals, magazines, blogs and websites pointing their attention towards this interesting and fascinating topic, the request for aesthetic medicine has increased manifolds.

Aesthetic Medicine is a new field of medicine, in which different specialists share the aim of constructing and reconstructing the physical equilibrium of the individual. Treatment of physical aesthetic alterations and unaesthetic sequel of illnesses or injuries, together with the prevention of aging, are perhaps two of the most iconic areas of intervention for Aesthetic Medicine.

" We are delighted to present the better. Now you can guarantee your health it's in safe."

Aesthetic Medicine was born in France 40 years ago.

The French Society of Aesthetic Medicine was the first of its kind in the world, followed by Italy, Belgium and Spain.

Starts were rather difficult as aesthetic procedures in those early years were only surgical.

At that time aesthetic doctors and cosmetic dermatologists had very few real medical procedures to offer to their patients for treating aesthetic problems on face and body.

At the beginning of the '80s, viable medical procedures started to emerge in Europe for aesthetic and cosmetic purposes. Mostly, at that time, they were imported from the United States: those included collagen injections for wrinkles (Zyderm by Dr. Stegman), and chemical peels (phenol by Dr. Baker, TCA by Dr. Oba- gi).

But, subsequently, European research on Aesthetic Medicine gained momentum. Hyaluronic acid appeared on the market, as it was discovered that it could be used as a dermal filler for wrinkles. During the '90s, the use of lasers offered aesthetic doctors and cosmetic dermatologists new possibilities.
